

Electronic guarantees

Since 2011, Moderna Garanti maintains its unique status by delivering digital PDF-guarantees as a supplement to traditional physical documents. This implies that we use a scanned signature in order to sign our guarantees.

Besides the scanned signature PDF-guarantees contain an internationally approved digital electronic signature, verifying its validity. The digital signature is also valid when the guarantee is sent by e-mail.

Digital guarantees are fully supported within our self-service online solution POMnet. PDF-guarantees are published in the system without a physical copy.

Digitalization enables substantially faster distribution of guarantee documents, especially when the beneficiary is overseas.

We recommend that you always send your electronic guarantee document to your beneficiary by e-mail. In this way they immediately can verify its validity.

For more information about digital signatures kindly visit our certification partner at www.entrust.com.

Best regards,
Moderna Garanti
